Contents of Volume 254

Vol. 254 Nos. 1–4 **December 10, 2001**

Teleconnections between global sea-surface temperatures and the interannual variability of observed and model simulated rainfall over southern Africa
C.J deW. Rautenbach and I.N. Smith 1

Parameterisation of a simple semi-distributed model for assessing the impact of land-use on hydrologic response
S. Wooldridge, J. Kalma and G. Kuczera 16

Analytical solutions by the hodograph method to hydrodynamic problems for oil and gas traps
A.R. Kacimov and Y.V. Obnosov 33

Processes controlling the episodic streamwater transport of atrazine and other agrichemicals in an agricultural watershed
K.E. Hyer, G.M. Hornberger and J.S. Herman 47

Simulating unsaturated flow and transport in a macroporous soil to tile drains subject to an entrance head: model development and preliminary evaluation
A. Kohler, K.C. Abbaspour, M. Fritsch, M.T. van Genuchten and R. Schulin 67

Catchment-scale advection and dispersion as a mechanism for fractal scaling in stream tracer concentrations
J.W. Kirchner, X. Feng and C. Neal 82

An event-based approach to the hydrology of arid zone rivers in the Channel Country of Australia
A.D. Knighton and G.C. Nanson 102

Vegetation influence on runoff and sediment yield in the Andes region: observation and modelling
I. Braud, A.I.J. Vich, J. Zuluaga, L. Fornero and A. Pedrani 124

Renewal rate estimation of groundwater based on radioactive tracers (^{3}H, ^{14}C) in an unconfined aquifer in a semi-arid area, Iullemeden Basin, Niger
C. Le Gal La Salle, C. Marlin, C. Leduc, J.D. Taupin, M. Massault and G. Favreau 145

Regional flood frequency estimation with canonical correlation analysis
T.B.M.J. Ouarda, C. Girard, G.S. Cavadias and B. Bobée 157

Process controls of water balance variability in a large semi-arid catchment: downward approach to hydrological model development
C. Jothityangkoon, M. Sivapalan and D.L. Farmer 174

Modelling the spatial and temporal variations of the water balance for the Weser catchment 1965–1994
U. Strasser and W. Mauser 199

Estimation of sensible and latent heat flux from natural sparse vegetation surfaces using surface renewal
N. Zapata and A. Martínez-Cob 215

The role of forest cover on streamflow down sub-Mediterranean mountain watersheds: a modelling approach
A.-L. Cognard-Plancq, V. Marc, J.-F. Didon-Lescot and M. Normand 229

Potassium adsorption ratios as an indicator for the fate of agricultural potassium in groundwater
J. Griffioen 244
